A one-of-a-kind beauty, enrapturing,
that steals your breath away, leaving you
speechless. An extraordinary idea as the only
possible pathway, to get to where you want,
to explore, to go beyond.
The freedom of embracing the unknown, that
you know you'll love as a part of your very own
story. A thought that provokes your mind and
then inspires you to aim for the impossible,
making mistakes, yet being brave.
A magic je ne sais quoi that enchants and
intrigues you, moving you to feel more and to
sense uniqueness.

The choice to risk it all, the one that makes you
go for it, to impress yourself and all those who
are worth it.

Welcome to Azimut.

AZIMUT.
DARE TO AMAZE.

THE DESIGN & LIFESTYLE ON BOARD

S7, THE SMART SPORT YACHT

Shaped by an ambitious technological calling to be the most forward-facing sport yacht in her category, the S7 is a paradigm of peak performance and luxurious leisure. A marvel of razor agility and precision, she guarantees the lowest fuel consumption possible and a uniquely quiet allure. The main deck offers a fluid continuum between indoor and outdoor zones, allowing guests to savor their time and space at sea instinctively, in complete and harmonious freedom.

Embody an eco-sporty nature with the S7.

Welcome aboard, ladies and gentlemen.

Let us begin the tour.

A GREEN SOUL

A modern stylistic language also seen in car design lightens the external lines, restoring a feeling of dynamism.

Thanks to the extensive use of carbon fiber, the adoption of a triple VOLVO IPS engine configuration and a high-efficiency hull, S7 embodies the brand's revolutionary eco-sport philosophy, delivering maximum performance with a reduction in both fuel consumption and emissions of between 20 and 30% (compared to the traditional propulsion systems), ensuring maximum silence and a sharp, dynamic cruise. The S7's sporty character is highlighted by her sleek profile, enhanced by the arched line created by the extensive glazing that runs seamless along the superstructure. This magnificent graphical sweep and the cut-out bulwarks allow natural light to fill the interiors as much as possible.

FEEL FREE

The sportfly offers an extra area for relaxation, that preserves the aesthetics and performance of the yacht. It becomes even more habitable with sunbathing and al fresco dining served by the ample wet bar.

A FREE FLOW FROM INSIDE TO OUT

The continuity between the external and internal
lounging area liquifies the main deck into a unique
area, offering the owner a relaxed and free style of
onboard living.

The decision to place the galley towards the bow allows the layout to unfold from the salon onto the main deck, creating perfect continuity between the interiors and exteriors.

MULTIPLE MOODS

Each moment on board can be accompanied by the right atmosphere, thanks to a sophisticated smart lighting system that allows you to customize, the lighting of the opal LEDs, which run the ceiling from stern to bow and reappear in the owner's cabin. By regulating the brightness of the various LED zones with four presets, it is possible to keep the spotlight on what guests are doing. Together with the ribbed ceiling texture, it emphasizes the dynamism and versatility of the yacht.

BEYOND PURE PERFORMANCE

The carbon fiber-enhanced superstructure offers more spacious environments while maintaining excellent levels of performance and stability. The interior lounge is cool and modernly organized, flooded with light from the large side windows.

SPORT CHIC INTERIORS

A deep knowledge of life at sea cultures the latest trends and original design concepts by interior designer Yachtique to realize a dynamic and divergent interior scheme for the S7. The neutral palette of matte-finished colors is at once cozy and chic, softening the sleek, modern furnishings. The surfaces and spaces are designed to minimize obstacles and enhance continuity, expressing the series' sporty DNA on the inside as well.

S7 is the dream boat for contemporary owners who are dynamic and sporty, who love cruising in grand style and in absolute safety, and who also like to keep a close eye on sustainability.

Now, let us discover the guest accommodations.

Shall we?

YOUR COZY RESIDENCE ON THE SEA

The owner's suite is the most refined interpretation of Azimut's new sporty style with fresh tones and a comprehensive look, inspired by the modern luxury residence. A separate dressing room and ensuite bathroom complete the arrangement.

Mental clarity and physical richness find harmony in the master suite of the S7. The design details, both hidden and featured, serve a streamlined daily life, as well as a distinct aesthetic, while alludes to a world below the surface. Disguising expansive and accessible storage, the disappearing display cases and walk-in closet play the unexpected hosts for all manner of personal belongings. The furnishings at the foot of the bed, meanwhile, can be customized to provide dressers or seating, just ahead of the hidden TV. Couples have three choices for the glass pane separating the shower from the bedroom: opaque; transparent; or gently fading towards the top to preserve privacy while transmitting light.

COZY ON THE RUN

CONFIGURED FOR COMFORT

Guests of the S7 are sure to be surprised by the unprecedented layout, which offers four comfortable cabins. It's possible through the advanced triple pod propulsion system, which comes with a more compact engine room.

The suite is divided into different areas only conceptually, further inspiring a cross-pollinated style and living experience.

01 | THE DESIGN & LIFESTYLE ON BOARD

Every single piece of furniture on board is specially designed, the superfluous removed so as to let tactile and visual pleasure define the living areas.

02

HER MAIN TECHNICAL FEATURES

The beauty of the S7 is not solely a matter of exterior and interior design elements that combine to perfectly play out Azimut's essence. Her beauty is also about discovering the technological advancements and special components that contribute to making her truly unique and highly innovative.

LOW EMISSION YACHT

TRIPLE POD PROPULSION COMBINED WITH CARBON FIBER

The adoption of triple Pod propulsion, combined with the optimization of the water lines and the extensive use of carbon fiber, reduces fuel consumption and CO₂ emissions by 20 to 30%* in the main speed range.

*compared to vessels of the same weight and size with a traditional hard-chine hull and shaft line propulsion

CARBON-TECH GENERATION

Azimut's pioneering use of carbon fiber lamination goes beyond pure performance. The Carbon Tech Generation offers expanded volumes on board, while maintaining excellent dynamic stability and perfect handling. Preserving the yacht's low center of gravity, the carbon fiber was focused on the upper parts of the yacht, lightening the laminated components by up to 30% and reducing the natural roll momentum up to 15%.

② FLYBRIDGE

③ SUPERSTRUCTURE

④ AFT PART OF THE DECK

⑤ TRANSOM AND PLATFORM

ACTIVE TRIM CONTROL

Automated interceptors optimize the trim at every speed to maintain ideal hydrodynamics for performance and efficiency, at the same time negating any lateral imbalance due to sidewinds or weight distribution. With the pilot's peace of mind assured, the driving experience is simpler and more enjoyable.

INTEGRATED CONTROL AND MONITORING SYSTEM

The custom-installed Garmin electronics have been integrated to control and monitor every onboard system: from engines and alarms, to bilge and water discharge pumps, tank levels and engine room ventilation, right through to the sound system and the air conditioning units. The system can be accessed on board from both the interior and exterior helm stations and, with the mobile app, remotely from a tablet or smartphone.

ADVANCED JOYSTICK CONTROL

The Joystick acts as an analog for the yacht, offering intuitive, one-handed control in every situation. When the yacht is stopped, moving the Joystick forward or back, side to side, and twisting clockwise or counter-clockwise activates the engines to mimic that motion. It's the easiest way to pull off precise maneuvers. When Joystick Driving is activated, the autopilot is immediately engaged. For easy course correction, the driver may briefly twist the Joystick for 1 degree in that direction or twist and hold for 10 degrees. The Autopilot keeps a forward course after the Joystick is released.

HIGH TECHNICAL STANDARD DECLARATION

This yacht’s design and engineering meet the highest standards for production recreational vessels. Azimut Yachts issues a declaration of the premium materials, advanced technology and rigorous testing procedures.

Please consult your dealer for the latest specifications.

UNI ISO 8666
The performance described applies to a vessel with standard configuration (standard equipment installed) and a clean hull, propellers, and rudder. It is also noted that the performance described was recorded under favourable sea and wind conditions (Beaufort scale index 1, Douglas scale index 1); different and worse sea conditions could significantly impact performance.

CE MARK
Given the continual evolution of technology, Azimut | Benetti S.p.A reserves the right to modify the technical specifications on its vessels at any time and without prior notice.

THE SERIES S

AVANT-GARDE INTELLIGENCE

The seductively sportive Azimut S Series is the market's pinnacle of technological advancement and performance. Sensually streamlined exteriors make for a fiercely dynamic aesthetic, combining with innovative propulsion systems and last generation hulls to deliver a uniquely sporty experience. Daringly fusing high speed and extreme manoeuvrability with the lowest consumption of fuel achievable in its class, the S Series also makes extensive use of carbon fiber on its yachts to grant vast volumes without impacting on weight, therefore offering unanticipated ample living spaces.

Embrace the beauty of avant-garde intelligence.

ABOUT AZIMUT

A FAMILY-MADE COMPANY CULTURE

An immense and personal passion for the sea. A clear and forward-facing attitude. A strong and relentless work ethic. Since 1969, Paolo Vitelli, the creative visionary founder and businessman behind Azimut, has been set on challenging the industry's status quo with a daring desire: bring to life an unexpected nautical experience, through yachts built to combine alluring aesthetics with construction expertise and impeccable technology.

An audacious mindset that has, over time, surprised and captivated the yachting sector, transforming Azimut into a bold and recognizable benchmark, and laying the foundation for the birth of the largest megayacht builder in the world, the Azimut | Benetti Group.

The international and management-based standing of the company today, is deeply nourished by the solid and memorable family heritage that has distinguished it from the beginning. A historically pioneering vision that enables it to continue thriving day after day, through ingenious inventions and long-term goals that look to the future with Paolo's daughter, Giovanna Vitelli.

A SUSTAINABLE VISION TODAY, FOR TOMORROW

An avant-garde vision and a strong emotional appeal have shaped the history of Azimut as a leader in the field of nautical innovation as well as its commitment to the creation of a sustainable-oriented and attentive company culture today.

An ambitious and personal touch that has allowed Azimut to grow and evolve on both levels, embracing the challenge of a future nurtured by an eco-conscious approach to boat construction and by an authentic focus and responsibility on human well-being.

OUR ECO-YACHTING PHILOSOPHY

The Azimut I Benetti Group has made tangible investments to guide the Technical as well as the R&D departments toward the construction of yachts with a diminished environmental impact. Its main areas of intervention have focused on significantly lowering fuel consumption and CO2 emissions through the development of highly efficient hull designs, innovative propulsion systems and an extensive use of carbon fiber to decrease yacht weight.

A SAFE AND HEALTHY WORK ENVIRONMENT

The forerunning shipyard of Avigliana was the first of the company's Italian shipyards to obtain the ISO 45001 certification in 2011, attesting its rigorous abidance to all occupational health and safety requirements. Recognized as the most technologically-advanced shipyard in Europe, it has also led the nautical sector revolution in terms of being among the earliest adopters of the vacuum infusion process to drive resin into a laminate, avoiding styrene emissions and therefore guaranteeing its precious workers a healthier setting.

As of 2013, all the other Italian production sites have adapted to meet the necessary requirements to obtain the ISO 45001 certification.
